

Data Foundations Maturity Assessment

N-iX Data Foundation for Generative AI Services

Data Is Your Only Competitive Advantage in AI

In a landscape characterized by the rapid proliferation of Generative AI models, **the true differentiator between success and failure is the capability to effectively leverage data**. At N-iX, we believe that robust data foundations—encompassing technology, people, and processes—are essential to fuel AI and gain a competitive advantage.

Our holistic approach helps businesses overcome recurring challenges, turning data into a strategic asset:

Setting the Right Data Strategy and Implementation

Challenges in aligning data strategy with business goals, ensuring efficient and effective implementation

Ensuring Data Reusability and Addressing Redundancy

The need for quality and secure data that can be reused across multiple solutions while avoiding redundant information storage

Ensuring Regulatory Compliance and Robust Data and AI Governance

Navigating complex regulatory landscapes and ensuring stringent Data and AI governance practices to maintain compliance and trust

Keeping Up-to-Date with Rapidly Evolving Data Platforms

Staying current with the fast pace of technological advancements and integrating new platforms to maintain a competitive edge

6-Week Data Foundations Maturity Assessment

Service Overview

Overview:

The Data Foundation Assessment and Roadmap service is a 6-week technical discovery and design assessment engagement designed to analyze your current data landscape and deliver a comprehensive plan to build strong technical data foundations.

Whether onsite or online, our collaborative approach ensures a thorough understanding of your needs and current data environment, resulting in a clear project implementation roadmap and a detailed cost estimate.

Duration:

6-Week

Location:

Online / Onsite. Onsite sessions for the workshops are recommended but not required.

Format:

Assessment

Key Activities

- Analysis of initial requirements, creation of the assessment plan, stakeholder engagement.
- In-depth evaluation of current data foundation capabilities, covering data governance, data management, and data platform technology/architecture.
- Formulation of a recommended roadmap with prioritized initiatives, timeline, estimated efforts, and financial analysis.

Outcomes

By the end of the 6-week engagement, you will receive:

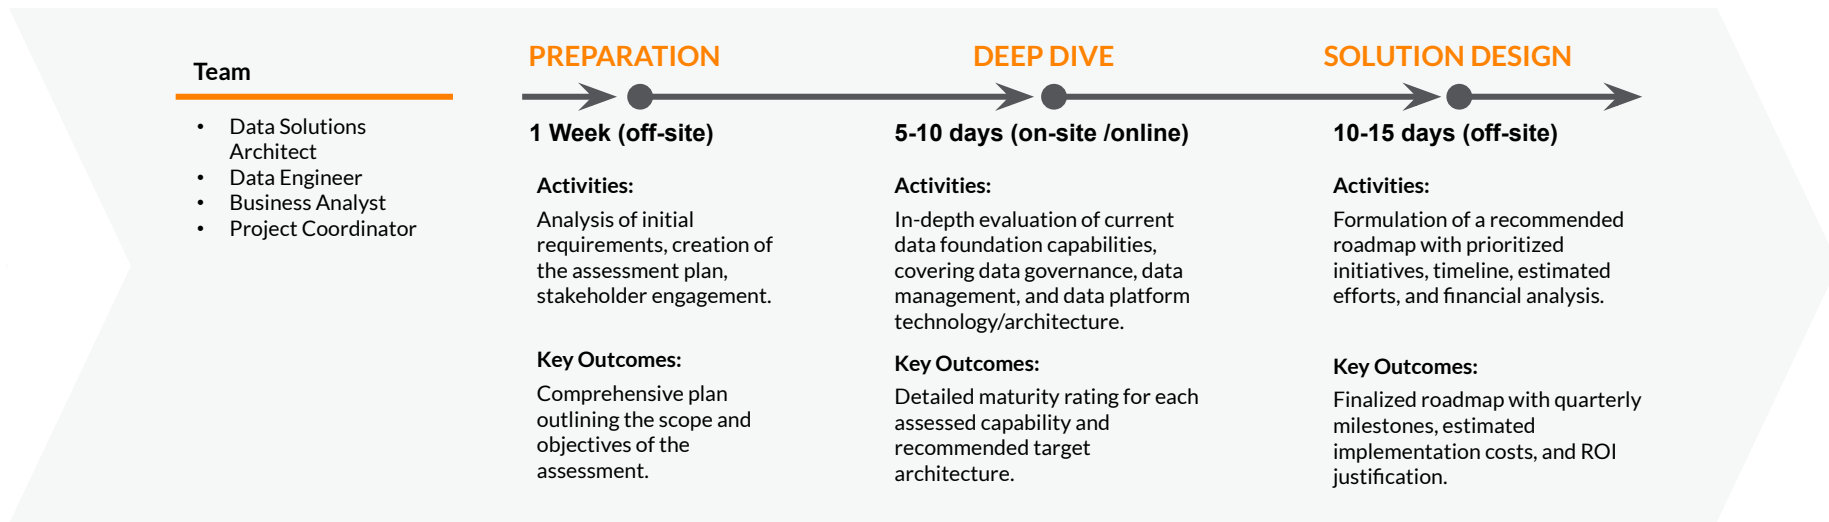

- Maturity Assessment: A detailed evaluation of your existing data governance, data management, and data platform technology/architecture capabilities.
- Capability Recommendations: Target maturity ratings and recommended enhancements to elevate your data foundation.
- Action Plan: Defined actions with priorities, timelines, and sequences to achieve the desired maturity.
- Implementation Roadmap: A well-structured implementation plan with quarterly milestones and estimated costs.
- Financial Justification: An analysis illustrating potential ROI, ensuring the financial feasibility of the proposed plan.

Benefits

Leverage proven reference architectures and expert insights to build the robust data foundations your organization needs for AI and advanced analytics success.

6-Week Data Foundations Maturity Assessment

High Level Workplan Overview

Deliverables:

- ◆ **Maturity Assessment:** A detailed evaluation of your existing data governance, data management, and data platform technology/architecture capabilities.
- ◆ **Capability Recommendations:** Target maturity ratings and recommended enhancements to elevate your data foundation.
- ◆ **Action Plan:** Defined actions with priorities, timelines, and sequences to achieve the desired maturity.
- ◆ **Implementation Roadmap:** A well-structured implementation plan with quarterly milestones and estimated costs.
- ◆ **Financial Justification:** An analysis illustrating potential ROI, ensuring the financial feasibility of the proposed plan.
